

Module 2 Quiz: Intents

1.

Watson Assistant (formerly Conversation) can only be used to create chatbots in English.

1 / 1 point

- ☐ True
- ☒ False

✓ **Correct**

English is the default, but you can choose among many languages.

2.

Select all the statements that are true.

3 / 3 points

- ☒ An intent is a purpose or goal expressed by the user's input

✓ **Correct**

Intents recognize the *intent* expressed in a customer's input.

- ☒ Intents start with an # symbol

✓ **Correct**

Intents start with an # symbol, unlike @entities and \$context variables.

- ☒ We should provide Watson with at least 5 examples per intent

✓ **Correct**

A generous amount of examples will fine tune Watson's understanding of an intent. 5 is the recommended minimum.

- ☐ Intents can have spaces in their names

- ☒ We train Watson by providing examples for our intents

✓ **Correct**

Our examples train Watson on what a given intent might look like. This way, it can recognize when the user expresses the same intent in their own words.

3.

The three main components of a Dialog Skill are Intents, Entities, and Dialog.

1 / 1 point

- ☒ True
- ☐ False

 **Correct**

4.

If Watson detects the wrong intent, we can train Watson by selecting a different intent from the Try it out panel.

1 / 1 point

- ☒ True
- ☐ False

 **Correct**

That's right. Quite convenient, in fact.

5.

The Content Catalog offers collections of pre-made intents for various industries.

1 / 1 point

- ☒ True
- ☐ False

 **Correct**

You got it.
