Module 5 Quiz: Deployment

1. The Watson Assistant (formerly Conversation) plugin for WordPress allows us to deploy a chatbot by specifying the credentials of the corresponding Assistant, without the need to develop a separate, proxy application.

   1 / 1 point

   ◉ True

   ○ False

   ✓ **Correct**
   It's quite convenient when deploying on WordPress sites as it doesn't require us to develop an application that sends the user input to the Watson Assistant service.

2. A preview link integration allows us to share our chatbot with friends and colleagues.

   1 / 1 point

   ◉ True

   ○ False

   ✓ **Correct**
   That's right, a handy feature.

3. One or more skills can be linked to an Assistant. In other words, an Assistant can "contain" one or more skills.

   1 / 1 point

   ◉ True

   ○ False

   ✓ **Correct**
   That's right. Typically it will include a Dialog Skill.

4. The WordPress plugin for Watson Assistant allow us to customize the look and feel of the chat box that appears on the site.

   1 / 1 point

   ◉ True

   ○ False

   ✓ **Correct**
   Indeed. It's quite flexible.

5. There is no way to limit the chatbot usage in the Watson Assistant WordPress plugin (to prevent abusive users).   1 / 1 point

○ True

◉ False

✓ **Correct**
That's right. There are some nice usage management features baked right into the plugin.
